d) Board Members and Committees

Operating Principles of the Board of Directors

Board members and their terms are determined during General Assembly meetings. The Board of Directors operate transparently, accountably, fairly, and responsibly. It is essential that the Board of Directors convene as often as necessary to efficiently perform their duties. The Company's Board convened twice: in an Extraordinary General Assembly on April 4, 2023, and in an Ordinary General Assembly on December 29, 2023.

During the General Assembly held on April 4, 2023, the number of Board Members was raised to five (three on December 31, 2022). At the General Assembly held on December 29, 2023, following the public offering, six members including independents, were appointed to the Board of Directors for a three-year term. There was no loss of independence during the 2024 operating year.

The Board of Directors held 2 physical meetings in 2024 and held consultations to make decisions on related issues outside the physical meetings and took a total of 17 decisions.

The format of meetings, resolutions, meeting requirements, voting process, and the duties and responsibilities of the Board of Directors are governed by the pertinent provisions outlined in the Articles of Association (AoA), the TCC, and CMB regulations.

Corporate Governance Committee

The Corporate Governance Committee is instituted to evaluate the implementation of corporate governance principles within the Company. In cases where adherence is lacking, it investigates the underlying reasons for non-compliance and identifies potential conflicts of interest. It also provides

recommendations to the Board of Directors to enhance corporate governance practices and oversees the activities of the Investor Relations Department.

Due to the structure of the Company's Board of Directors, separate Nomination and Remuneration Committees have not been established. Therefore, the Corporate Governance Committee will also assume the responsibilities of the Nomination and Remuneration Committees in accordance with the Corporate Governance Principles.

The Corporate Governance Committee meets at least four times quarterly and the meeting results are reported to the Board of Directors. The Committee's decisions serve as advisory recommendations to the Board of Directors, which retains the ultimate authority in making decisions on relevant matters.

Risk Committee

The Risk Committee is formed to proactively identify any risks that could jeopardize the Company's stability, growth, and advancement. Its mandate includes implementing necessary precautions and effectively managing the risks once identified. The Risk Committee meets at least four times quarterly and the meeting results are reported to the Board of Directors. The Committee's decisions serve as advisory recommendations to the Board of Directors, which retains the ultimate authority in making decisions on relevant matters. The Committee updates the Board of Directors on all developments falling under its authority and responsibility.

Audit Committee

The Audit Committee oversees the Company's accounting system, the disclosure of financial information to the public, and their independent audits. Additionally, it supervises the proper functioning and effectiveness of the Company's internal audit and control systems.

2- OVERVIEW OF THE COMPANY AND SUMMARY OF OPERATING SECTOR

History

The Company was established on September 21, 2012, under the title AtaKey Patates Gıda Sanayi ve Ticaret Anonim Şirketi, with a capital of 8,000,000 Turkish lira corresponding to 8,000,000 shares. The Company was established by Erhan Kurdoğlu, Korhan Kurdoğlu, Tuna Kurdoğlu, Murat Özgörkey, and Selim Özgörkey. The AoA was registered on September 21, 2012, and was published in the Turkish Trade Registry Gazette No. 8162, dated September 27, 2012.

The Company commenced construction of production facilities in Susuz Municipality of Afyonkarahisar at the beginning of 2013, and within an 11-month period, completed all construction, mechanical, and electrical works, as well as assembly and commissioning of equipment. The Company initiated production in early February 2014, manufacturing “saleable” products and commencing dispatch and sales operations. The Company supplies french fries to TFI TAB Gıda restaurants and exports frozen and deep-frozen potatoes for frying to cater to the potato product needs of TFI TAB Gıda's HSR China operations.

The Company's potato production facility occupies a 168,000-square-meter site and has an annual production capacity of 90,000 metric tons of seasoned potatoes for frying. The Company also has a raw material warehouse on a 30,000-square-meter site and a 15,000-square-meter cold storage room. During the season, around 200 workers harvest crops across nearly 40 square kilometers of agricultural land spanning 23 different cities. The Company supplies farmers with seeds and fertilizer to maintain consistency and quality in potato production at the source.

In 2014, Erhan Kurdoğlu, Korhan Kurdoğlu, and Tuna Kurdoğlu transferred their shares to TFI Tab Gıda. Consequently, TFI TAB Gıda acquired 50 percent ownership of the Company.

After the initial investments, additional mechanical cutting lines were installed in 2014 and 2015 to complement the waterjet-cutting lines. This investment expanded the product range to include items suitable for mechanical cutting. In 2015, as part of a strategic decision, S1 seed multiplication operations were relocated to fields leased from TIGEM (General Directorate of Agricultural Enterprises) without any external service procurement. This method has been consistently used for eight seasons. Additionally, in late 2015, a new product called “cage fries” was introduced in the mechanical cutting facilities and made available to fast-food restaurants.

In 2016, the first export was made to China. In 2017, an investment was made in a seed storage facility with an indoor area of 7,500 square meters. While raw potatoes are stored in bulk, the seed storage facility utilizes the container system. The seed storage facility has the capacity to store 15,000 metric tons of seeds while the raw potato warehouse can hold 70,000 metric tons of raw potatoes. In 2018, the Company developed and introduced “spicy crinkle fries” for fast-food restaurants. The investment for the fourth packaging line was initiated in late 2019 and, with the installation and commissioning completed, the plant began operations in August 2021. On June 8, 2019, TFI TAB Gıda took over the remaining 50 percent of Company shares from Murat Özgörkey and Mustafa Selim Özgörkey and became the sole shareholder of the Company.

In 2023, 20.3 percent of shares were offered to the public on Borsa Istanbul.

General Overview and Operating Sector

The Company’s plant in Susuz Municipality of Afyonkarahisar is one of Türkiye’s largest in its production line with an annual potato production capacity of 90,000 metric tons on 168,000 square meters of land, including a 75,000-square-meter indoor area. The cutting-edge production line equipped with innovative agricultural technology is one of the largest in the region and Türkiye, and contributes significantly to the national economy while offering increasing employment opportunities by recruiting producers in the system.

The Company’s final product portfolio includes seasoned/unseasoned french fries, potato wedges, crinkle fries, cage fries, and spicy crinkle fries.

Atakey has imported high-quality seeds from abroad and started using them for commercial potato production after multiplication. The Company has been producing its own seeds on lands leased from TIGEM since 2015 and has built its production process on this system. A specialized team of agricultural engineers manages the seed planting process and applies advanced techniques to grow quality seeds. None of the seeds or successive potatoes contain genetically modified organisms and are extensively analyzed during the growing and harvesting seasons.

While Atakey’s primary field of operation is seed production for commercial purposes, it also participates in the supply of raw and secondary materials, seed selection, agricultural production, manufacturing, export and import activities, bulk and retail sales, marketing, and product distribution. The plant located in the Susuz Municipality of Afyonkarahisar has the capacity to store 70,000 metric tons of potatoes and 15,000 metric tons of seed potatoes. The storage facility consists of multiple rooms of 3,500 metric tons of capacity each. Supply and return vents for cooling as well as the temperature and humidity are controlled by a centralized cutting-edge computer system.

Atakey operates in the processed frozen potato sector. In the supply of potatoes, especially those intended for frying or cooking, and with french fry producers in production.

The amount of potato production may vary based on reducing planting areas, fluctuations in prices, and climatic conditions. The Potatoes Bulletin issued by the Ministry of Agriculture and Forestry stipulates that 5.1 million metric tons of potatoes were produced in Türkiye in 2021, with a 2-percent drop compared to the previous year. Konya takes the lead with 622,435 metric tons (12.2 percent), followed by Niğde with 575,627 metric tons (11.3 percent) and Afyonkarahisar with 562,927 metric tons (11.0 percent).

The potato is a vital agricultural crop used for human consumption, both fresh and processed, as well as for animal feed in the form of tubers or production waste. It also serves as a source of seed to ensure the continuity of production and for general processing in the food industry. As a fundamental source

of nutrition, the demand for and consumption of potatoes continues to rise daily alongside the growth of the world population, with their usage diversifying accordingly. Potato consumption has fluctuated over the last five years, with a 1.9 percent increase in the 2020/21 season compared to the previous year, and a 12.1 percent increase compared to the 2016/17 period. Potato consumption per capita changed by 48–52 kilograms during these years (Source: TEPGE Potato Product Report, 2022). The Company has managed to reduce the cost of raw potatoes through well-established agricultural methods and stringent policies. Furthermore, the Company produces S1 seeds (certified seeds produced from high-quality seeds) exclusively on dedicated seed production lands leased from TIGEM, subsequently ensuring the quality and cost efficiency of seed multiplication. It also secures the supply thanks to high-production capacity, minimizing losses in raw potato storage and production, resulting in a subsequent increase in productivity.

Atakey is a major actor in the market for fried and deep-frozen potatoes as well as for potatoes for frying in terms of production and sales volume. The Company's value-added product portfolio contributes to the growth of both sectors and Türkiye's agricultural economy, owing to its potential for growth, sales and export opportunities, and new investment prospects.

The sources of finance and, if any, the quality and amount of issued capital market instruments:

In addition to revenue generated from operations, the Company benefits from external sources of financing, including export loans and working capital loans. The Company conducted its initial public offering on Borsa Istanbul in 2023, resulting in a capital increase of 810,107,872 Turkish lira.
